

# 1 Day Searching & Social Networking Course

Taken from our full 4 day course on Using The Internet As An Investigative Tool, which is recognised by the University of Portsmouth's Institute of Criminal Justice Studies, this 1 day course is aimed at giving those within law enforcement & investigations the understanding and practical techniques that they need to fully use the increasingly useful tool that is the internet.

To use the internet fully you must know how to search effectively, getting back only useful & relevant results rather than many thousands of results that you will never read.

Social Networking sites have not only taken over the internet but the lives of many. If you don't have a Facebook or Twitter account, then you most likely know someone who does and they will be putting every experience & thought online, and it is the same for the people you are interested in researching & understanding.

This is what we will show you on this course.

| Sector           | Session  |
|------------------|--|
| <b>Morning</b>   | <b>Registration &amp; Introduction to Basic Internet Investigation</b> |
| Break            | Coffee / Tea   |
