

TWO-DAY TECHNICAL LAW ENFORCEMENT OSINT COURSE

Methodology:

While maintaining law and order, preventing crime, reducing the fear of crime and protecting members of the public along with their property, law enforcement officers and staff use a range of technology to protect individuals, identify the perpetrators of crime and ensure successful prosecutions against those who break the law. At Qwarie we believe OSINT should be an essential part of any investigators toolkit. In this two-day course, you will have the opportunity to use & practice OSINT techniques with the guidance and assistance of our specialist trainer.

Audience:

Up to 10 participants, this training is suitable for all law enforcement officers and staff conducting online research for law enforcement purposes.

Objectives:

- Learn about the types of offences that may be detected with the help of OSINT.
Understand how OSINT can be used in preventing, detecting and prosecuting offences.
- Use the Internet to pro-actively identify perpetrators.
- Learn how to gather Intelligence from social media, photos and video on the internet.
- Participate in OSINT techniques that OSINT investigators deploy to

identify offenders and offences.

- Demonstrate how to produce evidence for prosecution.

Learning Outcomes: delegates will acquire:

- An awareness of the scale of information and intelligence available on the internet for law enforcement purposes.
- Knowledge of and application of OSINT techniques that may be applied during an investigation.
- Identification of suspects using social media and the web.
- Practice skills to detect, identify and disrupt offenders.
- The ability to present a compliant case for criminal prosecution.
